

Pesticide testing laboratories in Delhi

†1809. SHRI DATTA MEGHE: Will the Minister of AGRICULTURE be pleased to state:

(a) whether it is a fact that a laboratory has been set up in Delhi to test the pesticides in fruits and vegetables;

(b) if so, the effective steps taken by Government to ensure that the pesticides and chemical manures are not used indiscriminately to increase the yield of fruits and vegetables; and

(c) what action is taken against the people who play with the health of common people in such a way?

THE MINISTER OF STATE IN THE MINISTRY OF AGRICULTURE (SHRI KANTI LAL BHURIA): (a) Several laboratories in Delhi are engaged in work relating to pesticide residue analysis in fruits and vegetables.

(b) and (c) Government has adopted Integrated Pest Management as the cardinal principle of its Plant Protection Policy which envisages use of cultural, biological and mechanical methods and judicious need based use of chemical pesticides. Central Integrated Pest Management (IPM) Centres have been set up across the country to, *inter alia*, impart training to farmers and extension functionaries in Integrated Pest Management by organizing Farmers Field Schools (FFSs). IPM packages of practices for pest/disease management in 77 major crops have been developed and circulated to all States/UTs and have been posted on www.dacnet.nic.in/ppin.

The Insecticides Act stipulates that labels and leaflets accompanying pesticides packages should contain instructions regarding the approved uses, doses, time of application, precautions, pre-harvest intervals (waiting period), etc. to ensure safe use of pesticides. Non-compliance with these provisions are punishable under the Insecticides Act, 1968.

Labs for testing quality of fertilizers

†1810. SHRI MOTILAL VORA: Will the Minister of AGRICULTURE be pleased to state:

(a) whether it is a fact that products of some fertilizer companies have
